

ABC20 Series Two Way And Three Way Motorized Valve

BRIEF INSTRUCTION

ABC20 series of Motorized Valve is used to control the on-off conversion of Heating Air Condition Water System, it is consist of a driver and a valve body .The driver adopts the synchronous motor to make its performance more stable and prevent the water hammer.

Features

- Valve body is plated with rustproof brass, and chromium on the surface.
- Low power, the motor only consumes the power when the valve door is opening or closing.
- It is set the limit relay contact inside to make the motor longer life.
- The motor and the valve body can be separated and connected in short time, in order to install it more easily.

Specifications

- Power Voltage:220V±10%, 50/60Hz
- Pressure: 1.6Mpa
- Power Consumption:<7W
- Media Temperature: 5~90_
- Valve Action Time: Open<10s, Return<6s
- Working Environment: 5~60_,10%-95%RH

Model Listing

Model	Size	Size	Model	Size	Size
(2-way)	(mm)	(inch)	(3-way)	(mm)	(inch)
